

# EXHIBIT 14

operations during flight testing. Ms. Windsor's duties, which were related to information security, were substantially different than the duties of the other information technology specialists who were transferred as a result of ATTC's reorganization. Based upon Ms. Windsor's information technology specialist duties concentrating in information security, Ms. Windsor was assigned to the Test Support Directorate in 2002, while the other 2210 series employees were assigned to a separate Directorate which was responsible for flight test data management and data processing software applications.

3. Ms. Windsor received a special performance appraisal for the period September 19, 2002 through January 17, 2003. She received an overall performance rating of "2" on a scale of "1" to "5." A score of "1" is the highest possible rating and a "5" is the lowest possible rating. Ratings of either "1," "2," or "3" are considered fully successful ratings. While Ms. Windsor's performance was completely satisfactory during this rating period, as evidenced by her receiving the second highest rating, her performance was not considered as excellent with regard to 75% or more of her performance objectives, which was the threshold for the highest overall performance rating, a "1."

I declare under penalty of perjury that the above statement is true and correct to the best of my knowledge.

Executed this 19<sup>th</sup> day of October, 2006.

  
LTC (Ret.) Keith Darrow
